

Castor + The Information Lab, Netherlands Analyzes COVID-19 Medical Research

To save lives with Alteryx

1

Goal

"The priority was enabling our customers to take their data and **quickly generate insights** in a chaotic global environment."

2

Strategy

"**The Castor platform feeds data into Alteryx APA Platform**, where it is transformed, analyzed, and then pushed back out to Tableau for visualisation."

3

Results

"Automation of those processes would **get us to the insights quicker and that would help us save lives.**"

4

Next Steps

"Every day we are starting new trials, and we will also **start investing in capturing and standardizing data for competitive advantage** and to create exponential value out of the combination of all these projects."
