

# Alteryx Designer - FIPS

Alteryx Designer - FIPS is an intuitive solution that empowers you to blend disparate data for faster results in a more secure environment. Using repeatable drag-and-drop workflows, you can quickly profile, prepare, and blend all of your data without having to write code or custom scripts. And now you can expand access to analytics within environments that require a FIPS capable experience that allows users to accelerate from questions to answers and empower mission outcomes.

## FROM RAW DATA TO READY-TO-USE RESULTS

**Combine data sets** – Import and use multiple sources, plus analyze them in a FIPS compatible environment

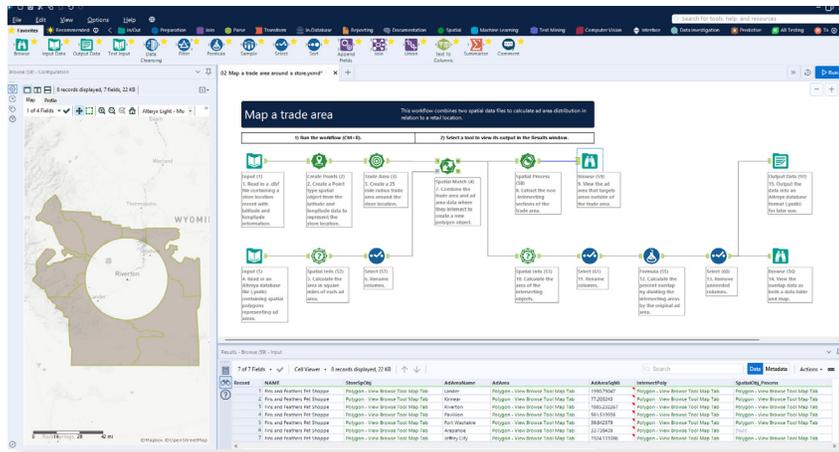

**Improved security** – With FIPS capability and no-code, low-code analytics, you can scale processes across governed environments.

**Visually represented process** – Annotated workflows make it easy for anyone to follow the entire journey of your data Visualytics

"I'm able to take hours of work and literally pull it out in a **three minute workflow**. Alteryx helps us be strategic, and I think that's what I'm most excited about."

**AMY ROLL**

Manager of Compensation Data Analytics, BAE Systems

## Cleanse, Prep, and Blend

Create visual analytic models of any business process in minutes. With a FIPS capable platform, you can transform your simple and complex data into business outcomes with no-code, automated building blocks. They quickly integrate with your applications, databases, spreadsheets, documents, and more.

## ABOUT ALTERYX

Alteryx, the Analytics Automation company, is focused on enabling every person to transform data into a breakthrough. Alteryx unifies analytics, data science and business process automation in one, end-to-end platform to accelerate digital transformation and shape the future of analytics automation. Organizations of all sizes, all over the world, rely on Alteryx to deliver high-impact business outcomes and the rapid upskilling of their modern workforce. For more information visit [www.alteryx.com](https://www.alteryx.com).

Alteryx is a registered trademark of Alteryx, Inc. All other product and brand names may be trademarks or registered trademarks of their respective owners.

## Track Your Data's Journey

Workflows that solve valuable business processes should be shareable. Traditional spreadsheets make it difficult for others to follow your logic from beginning to end.

Enter Designer - FIPS.

The analytic canvas visually documents every part of your analysis so anyone with the proper access can trace it. From data input to transformation and output, it's all annotated for others to follow and repeat. Every process is repeatable, and workflows can be automated to output to a variety of data sources, powering faster business decisions.

## Scale Access From One to Many

We want to take the pain out of administration. Easily scale your Alteryx deployment from a few seats into a widespread, inter-departmental analytics ecosystem leveraged by thousands of users. Insights can be accessed across your organization in a more secure environment that adheres to NIST FIPS Standards.

With Alteryx Designer - FIPS, you will have a broad depth of functionality that meets the needs of all data workers, from data novice to data warrior.
