

# Localization and Language Support Across Products

## Localization Per Product

The table below illustrates the level of localization for a particular product. If the language has an “x” attributed to it, this means the product has a localized, translated UI and our localization team of linguistic specialists work to support this product. If the language does not have an “x” attributed, then that language is not a language option of the UI for that product.

**Example:** Designer desktop and the Intelligence Suite can be utilized in any of our eight supported languages within the UI either by language selection at install or the globe icon to the right of Help in the main menu bar of Designer, whereas Server and Connect are English only.

PRODUCT NAME	ENGLISH	FRENCH	GERMAN	JAPANESE	LATAM SPANISH	BRAZILIAN PORTUGUESE	ITALIAN	SIMPLIFIED CHINESE
Designer	X	X	X	X	X	X	X	X
Server Non-Admin (Beta)	X	X	X	X	X	X	X	X
Server Admin	X							
Connect	X							
Promote	X							
Alteryx Intelligence Suite	X	X	X	X	X	X	X	X
Alteryx Machine Learning	X							
Alteryx Auto Insights	X							
Designer Cloud powered by Trifacta	X							

## Language Support Per Product

If a customer asks about an issue around a product, our support team will try to recreate the issue; if it’s reproducible, a case is opened and a communication around resolution/expectations will be delivered to the customer.

**Example:** If a French user runs into an issue on Server that impedes them from using Server because of their French environment, their issue should be supported and addressed even if they’re using one of our products that consists of an English UI.

PRODUCT NAME	ENGLISH	FRENCH	GERMAN	JAPANESE	LATAM SPANISH	BRAZILIAN PORTUGUESE	ITALIAN	SIMPLIFIED CHINESE
Designer	X	X	X	X	X	X	X	X
Server	X	X	X	X	X	X	X	X
Connect	X	X	X	X	X	X	X	X
Promote	X	X	X	X	X	X	X	X
Alteryx Intelligence Suite	X	X	X	X	X	X	X	X

## Text Mining Tools Language Capabilities

The Text Mining category within the Alteryx Intelligence Suite SKU has varied language support due to the underlying libraries. Examples of varied language support is shown below.

- Users can create word clouds with the Word Cloud Tool with French, German, Spanish, Portuguese, and Italian text. Multi-byte character languages, such as Japanese and Chinese, are not supported and thus users are not able to create word clouds with the Word Cloud tool with Japanese and Chinese characters.
- The Sentiment Analysis Tool is currently only able to perform sentiment analysis on English text.

TOOL	ENGLISH	FRENCH	GERMAN	JAPANESE	LATAM SPANISH	BRAZILIAN PORTUGUESE	ITALIAN	SIMPLIFIED CHINESE
Text Pre-Processing	X	X	X		X	X	X	
Sentiment Analysis	X							
Word Cloud	X	X	X		X	X	X	
Topic Modeling	X	X	X		X	X	X	
Named Entity Recognition	X	X	X		X	X	X	
Part-of-Speech Tagger	X	X	X		X	X	X	

**Note:** All tools contained in the Machine Learning and Computer Vision categories have full language support. All tools in the Alteryx Intelligence Suite have been localized, meaning the Graphic User Interfaces have been translated, reviewed, and localized by our internal team of localization specialists.
