Symphony Care Network Leverages Alteryx to Track COVID-19 Care Data Across Patient Facilities

$1.3 million in company cost-savings through automation of data-gathering processes.

Symphony CARE NETWORK

1

Goal

"There was no consistent way to track which patients and employees of ours had been exposed to COVID or who had received care in all 34 of our care facilities."

2

Strategy

"We turned to Alteryx for analytics solutions that made the data we gathered more accessible. Very quickly, we were impressed at how quickly we were able to gain insights and **move out of Excel entirely."**

3

Results

"We've estimated that we've **saved $1.3 million in cost-savings** through automating our data-gathering processes, and gained an **800% increase in productivity."**

4

Next Steps

"We're looking at finding ways to get better usage out of our analytic apps across departments."
