LOCALIZATION PER PRODUCT

The table below illustrates the level of localization for a particular product. If the language has an “x” attributed to it, this means the product has a localized, translated UI and our localization team of linguistic specialists work to support this product. If the language does not have an “x” attributed, then that language is not a language option of the UI for that product.

Example: Designer desktop and the Intelligence Suite can be utilized in any of our eight supported languages within the UI either by language selection at install or the globe icon to the right of Help in the main menu bar of Designer, whereas Server and Connect are English only.

PRODUCT NAME	ENGLISH	FRENCH	GERMAN	JAPANESE	LATAM SPANISH	BRAZILIAN PORTUGUESE	ITALIAN	SIMPLIFIED CHINESE
Designer	X	X	X	X	X	X	X	X
Server	X							
Connect	X							
Promote	X							
Alteryx Intelligence Suite	X	X	X	X	X	X	X	X
Alteryx Analytics Hub	X							

OS LANGUAGE SUPPORT PER PRODUCT

Alteryx supports all the OS environments of the languages that we support.

If a customer asks about an issue around a product, our support team will try to recreate the issue; if it’s reproducible, a case is opened and a communication around resolution/expectations will be delivered to the customer.

Example: If a French user runs into an issue on Server that impedes them from using Server because of their French environment, their issue should be supported and addressed even if they’re using one of our products that consists of an English UI.

PRODUCT NAME	ENGLISH	FRENCH	GERMAN	JAPANESE	LATAM SPANISH	BRAZILIAN PORTUGUESE	ITALIAN	SIMPLIFIED CHINESE
Designer	X	X	X	X	X	X	X	X
Server	X	X	X	X	X	X	X	X
Connect	X	X	X	X	X	X	X	X
Promote	X	X	X	X	X	X	X	X

Alteryx Intelligence Suite	X	X	X	X	X	X	X	X
Alteryx Analytics Hub	X	X	X	X	X	X	X	X

TEXT MINING TOOLS LANGUAGE CAPABILITIES

Language capabilities in this context means:

- Creating word clouds with the Word Cloud Tool with French, German, Spanish, Portuguese, and Italian text. Multi-byte characters, in this case Japanese and Chinese, are not supported and thus are not able to create word clouds with Japanese and Chinese characters.
- The Sentiment Analysis Tool is currently only able to perform sentiment analysis on English text.
- Using the PDF Input Text Tool to import a PDF that contains any of our eight supported languages.
- Using the Image to Text Tool to select images that contain any of our eight supported languages and have it render in the desired language.

TOOL	ENGLISH	FRENCH	GERMAN	JAPANESE	LATAM SPANISH	BRAZILIAN PORTUGUESE	ITALIAN	SIMPLIFIED CHINESE
Text Pre-Processing	X	X	X		X	X	X	
Sentiment Analysis	X							
Word Cloud	X	X	X		X	X	X	
Topic Modeling	X	X	X		X	X	X	
PDF Input	X	X	X	X	X	X	X	X
Image to Text	X	X	X	X	X	X	X	X
Image Template	X	X	X	X	X	X	X	X

Note: All tools contained in the Intelligence Suite have been localized, meaning the Graphic User Interfaces have been translated, reviewed, and localized by our internal team of linguistic specialists.
